### **DETAILED ACTION**

In an amendment filed on January 08, 2008, claims 1, 9, 11 and 12 have been amended, Claims 10 and 13 have been canceled. Claims 1-9, 11, 12 and 14-29 are pending.

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-9, 11-12, 14-17 and 26-29 are drawn to a session ticket based authentication and encryption/decryption of messages, classified in class 726, subclass 10.
  - II. Claims 21-23 are drawn to a method of communication between service provider and socket applications on computing devices, classified in class 709, subclass 229.
  - III. Claims 18-20, 24 and 25 are drawn to a client application, an authorization service and a service provider, classified in class 726, subclass 4.
2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, the session ticket based authentication and encryption/decryption of messages in subcombination I can be utilized in communication authentication, while method of communication between service provider and socket applications on computing devices in subcombination II is utilized in network connection management and the a client application, an authorization service and a service provide in subcombination III can be utilized in client authorization for service. See MPEP 806.05(d).

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should the applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over prior art, the evidence or admission may be used in a rejection under 35 U.S.C 103(a) of the other invention.
